

Sonar Platinum and MusicIO

Track 1 : Midi inputs (controllers or iPad apps with midi output). Here keyboards controllers are sent to iPad's IM1. The MIDI signal can be recorded.

Track 2 : this audio track hosts MusicIO VST as an audio FX insert. Tracks's output goes to a patch point (new in Platinum) I called iPad Patch

Track 3 : this audio track has the patch point outputted from track 2 as input and the master as output. This track can record the audio signal coming from the iPad via musicIO.
